API Interface for importing stations data

1 - Stations Info

Url: /GetStationsInfo

Description: Returns list of stations info

Parameters: none

Output :

- “Station_id”: Station identification number
- “Name”: Station name
- “GeoLong”: Station longitude
- “GeoLat”: Station latitude
- “Status”: Station Status
- “Information”: Status description
- “Type”: Station type
- “LastSuccess”: The time of the last time measurements were received (MySQL standard datetime)

Ex:

```
[
  {
    " Station_id ": 122,
    "name": "Station_1",
    "geoLong": 41.697422222,
    "geoLat": 27.497780556,
    "status": "Successful",
    "information": "Successful",
    "type": "Stationtype",
    "lastSuccess": "2025-04-06T10:17:26.173398"
  },
  {
```

```
    " Station_id ": 322,
    "name": "Station_2",
    "geoLong": 41.697422222,
    "geoLat": 27.497780556,
    "status": "Successful",
    "information": "Successful",
    "type": " Stationtype ",
    "lastSuccess": "2025-04-06T10:17:26.173398"
  },
  {
    " Station_id ": 1024,
    "name": "Station_3",
    "geoLong": 41.697422222,
    "geoLat": 27.497780556,
    "status": "Successful",
    "information": "Successful",
    "type": " Stationtype ",
    "lastSuccess": "2025-04-06T10:17:26.173398"
  }
]
```

2-Stations Measurement in time Range

url: /GetStationsMeasurementRange?interval_code=T&start_time=1519084800&end_time=1519171200

Description: Get all measurements for stations for the given time range

Parameters:

- interval_code (String)
- start_time (timestamp)
- end_time (timestamp & optional)

Output:

- “Station _Id”: Station identification number
- “MeasurementValue”: Dose rate measurement with unit
- “measurementTime”: Time of measurement

Ex:

[

{

"Station_id": 122,

"measurementValue": "115.3003 nSv/h"

“measurementTime”: "2025-04-06T10:17:26.173398"

}, {

" Station_id ": 322,

"measurementValue": "115.3003 nSv/h"

“measurementTime”: "2025-04-06T10:17:26.173398"

}, {

" Station_id ": 1024,

"measurementValue": "57.32 nSv/h"

“measurementTime”: "2025-04-06T10:17:26.173398"

}

]

3-Stations Measurement

url: /GetLiveStationsMeasurement?live=false

Description : Get all measurements for stations (live or last successful measurement based on the value of parameter “live”)

Parameters :

- Live (boolean) indicates getting live (passing true) data or last successful data (passing false)

Output:

- “ Station _Id”: Station identification number
- “MeasurementValue”:Dose rate measurement with unit

Ex:

```
[
  {
    "Station_id": 122,
    "measurementValue": "115.3003 nSv/h"
  },  {
    " Station_id ": 322,
    "measurementValue": "115.3003 nSv/h"
  },  {
    " Station_id ": 1024,
    "measurementValue": "57.32 nSv/h"
  }
]
```

4-Station Measurement details:

Url: /data? Station_id=5

Description: Get live measurements for the given station Id

Parameters:

- Station_id : Station identification number

Output:

- “MeasurementName”: description
- “MeasurementValue” : measurement with unit

Ex:

```
[
  {
    "MeasurementName": "Wind Speed 10min",
    " MeasurementValue": "1.00 m/s",

  },
  {
    " MeasurementName ": "Wind Direction 10min",
    " MeasurementValue": "180.00 °",

  },
  {
    " MeasurementName ": "Temperature Internal 1min",
    " MeasurementValue ": "8.55 °C",

  },
  {
    " MeasurementName ": "Temperature Internal 1h",
    " MeasurementValue ": "9.77 °C",

  },
  {
    " MeasurementName ": "Temperature Internal 10min",
    " MeasurementValue ": "8.67 °C",

  } ]
```
